REMO IN PROGRESS

Targeting to foster regional exchange and improve the quality of working and learning mobility within initial VET, the REMO consortium has put a lot of work into the introductory research study in order to gain valuable feedback for the development of the REMO products from all main target groups. Work on quality process descriptions and the online platform has already started.

RESEARCH STUDY REPORT

Following a mixed methods approach using interview guidelines and questionnaires, research data of a total of 482 respondents out of all partner countries could be gathered, including the target groups of initial VET learners, HR managers and persons responsible for mobility in VET schools, sending and hosting organisations as well as external stakeholders.

Guiding results could be driven, facing much interest but big challenges alike. The full [research study report](#) as well as an executive

summary translated into all partner languages are available for download on the webpage www.remoproject.eu.

SECOND PROJECT MEETING

Taking place in Varaždin, Croatia, the consortium was gathering for the second project meeting from the 4th until the 5th of May 2015. Discussing outcomes of the research study, scheduling and working on quality process descriptions as well as first considerations concerning the online platform

were on the agenda.

COMING UP

Already started working on both parallel, the ISO 9001 coherent quality process descriptions and the online platform are in the development progress and focus of the project within the upcoming months.

Do you want to learn more about the REMO project? Visit our webpage www.remoproject.eu and get in contact with us.
